EXPERIENCE

IT Local — Full-stack Web Developer

- Built and maintained websites and APIs for **20+ client companies** in a team of 4+ developers: React pages, Node.js APIs with auth and validation, indexed schemas.
- Set up and secured **5–15 Ubuntu servers**; ran Node.js with PM2 and Docker behind Nginx and Cloudflare; fixed outages from logs.
- Replaced manual SSH deploys with a **CI pipeline**, so any teammate could release with the same reviewed steps.

Atlantis Investment — Backend Developer
Uzbekistan, alongside studies · 2022.05 – 2022.12

- Built Express.js REST APIs with JWT/session sign-in, uploads, and MongoDB indexes for search and paging.
